Risø Publication Activities in 1998

Risøs publikationsvirksomhed i 1998

Edited by Solvejg Bennov

**Risø National Laboratory, Roskilde, Denmark
April 1999**

Abstract

The report contains a list of references to the scientific and technical journal articles, books, reports, lectures published in full text, and to publications for a broader readership authored by researchers at Risø National Laboratory and published in 1998. If the publication mentioned in the reference is electronically available the link to the web-address is added. The references are organised according to the programme areas of Risø.

The text is introduced by total number of publications, distribution of types of publications, number of citations to the international scientific journal articles, institutions with which Risø has published the largest number of articles, and journals in which Risø has published most articles. The data are derived from Risø's in-house Publications Database and from the Risø Institutional Citation Report database produced by the Institute for Scientific Information.

Rapporten er en referenceliste til de videnskabelige og tekniske tidsskriftartikler, bøger, rapporter, publicerede konferencebidrag og publikationer af formidlende art, som er skrevet af Risøs forskere og udgivet i 1998. For publikationer, der er tilgængelige i elektronisk form, er web-adresse angivet. Referencelisten er sorteret efter Risøs programområder.

Rapporten indledes med oplysninger om samlet antal publikationer, fordeling efter publikationstyper, antal citationer til de internationale videnskabelige tidsskriftartikler, institutioner Risø publicerer flest tidsskriftartikler sammen med, samt i hvilke tidsskrifter Risø publicerer flest artikler. Oplysningerne er hentet fra Risøs egen Publikationsdatabase og fra Risø Institutional Citation Report produceret af Institute for Scientific Information.

Publishing activities

Risø's research results in comprehensive publishing activity through articles in international journals, research reports and other publications. This publication activity forms the basis for the dissemination of knowledge and

technology to industry and for the exchange of knowledge with Danish and international research institutions. A list of all Risø publications in 1998 is published in the report Risø-R-1097.

Figure 1. Risø's total annual publication activities in the period 1989–1998.

Figure 2. Number and distribution of Risø's publications in the period 1994–1998 and number of unpublished lectures in the same period.

Risø's articles in ISI Source Journals in the period 1983-1997

The Institute for Scientific Information (ISI) indexes more than 4000 international journals in the field of the natural and technical sciences, and approx. 3000 journals in the humanities and social sciences (ISI Source Journals). ISI publishes several different products based on Source Journals, including the Science Citation Index, which is used in connection with citation analyses. Risø subscribes to ISI's Institutional Citation Report (ICR), which is a database of references to the articles in ISI's Source Journals, in which Risø is given as the author's address. The database includes information on the number of times the individual articles have been cited and the expected

Figure 3. Risø's articles in ISI Source Journals in the period 1983–1997, specified in five-year periods.

Figure 4. Number of citations from Risø's articles in ISI Source Journals specified for the same five-year periods within which the articles were published.

Figure 5. Average number of citations per Risø article specified for the same five-year periods within which the articles were published.

number of citations of articles. Comparison of one five-year period with the preceding five-year period shows that both the number of publications and the number of citations is increasing (Figures 3 and 4). The database also makes it possible to analyse Risø's publication patterns, i.e. which journals publish most Risø articles. Figure 6 shows the 25 journals in which Risø has published most articles within the last five-year period 1993–1997. The database also makes it possible to illustrate Risø's collaboration with other research institutions. Figure 7 shows the 25 institutions with which Risø has jointly published most articles in the period 1993–1997.

Publikationsvirksomhed

Risøs forskning resulterer i en omfattende publikationsvirksomhed gennem artikler i internationale tidsskrifter, forskningsrapporter og andre publikationer. Denne publikationsvirksomhed danner grundlaget for overførsel af

viden og teknologi til erhvervslivet og for udveksling af viden med danske og internationale forskningsinstitutioner. En liste over alle Risøs publikationer i 1998 udgives i rapporten Risø-R-1097.

Figur 1. Risøs samlede, årlige publikationsvirksomhed i perioden 1989-98.

Figur 2. Mængden og fordelingen af publikationer fra Risø i perioden 1994-1998 samt antal upublicerede foredrag i samme periode.

Figur 3. Risøs artikler i ISI Source Journals i 1983-1997 angivet i 5-års perioder.

Figur 4. Antal citationer af Risøs artikler i ISI Source Journals givet inden for samme 5-års periode som artiklerne er publiceret i.

Figur 5. Gennemsnitligt antal citationer pr. Risø-artikel givet inden for samme 5-års periode som artiklerne er publiceret i.

Risøs artikler i ISIs Source Journals i perioden 1983-1997

Institute for Scientific Information (ISI) indekserer mere end 4000 internationale tidsskrifter inden for det naturvidenskabelige og teknisk-videnskabelige område og ca. 3000 tidsskrifter inden for humaniora og samfundsvidenskab (ISI Source Journals). ISI udgiver flere forskellige produkter baseret på Source Journals, blandt andet Science Citation Index, som benyttes i forbindelse med citationsanalyser. Risø abonnerer på ISIs Institutional Citation Report (ICR), som er en database med referencer til de artikler i ISI Source Journals, hvor Risø er anført som forfatteradresse. I databasen er der blandt andet oplysninger om, hvor mange gange de enkelte artikler er citeret

og hvor mange gange artiklerne forventes at være citeret. En sammenligning af femårsperioden med foregående femårsperioder viser, at både antallet af publikationer og antallet af citationer er stigende (figur 3 og figur 4). Databasen giver endvidere mulighed for at analysere Risøs publikationsmønster, dvs. hvilke tidsskrifter, der fortrinsvis publiceres i. Figur 6 viser de 25 tidsskrifter, som Risø har publiceret mest i, inden for den sidste 5-årsperiode 1993-1997. Databasen giver også mulighed for at belyse Risøs samarbejde med andre forskningsinstitutioner. I figur 7 er vist de 25 institutioner, som Risø i perioden 1993-1997 har publiceret flest artikler sammen med.

Figur 6. De 25 ISI Source Journals, som Risø har publiceret mest i, inden for perioden 1993-1997.

Figur 7. De 25 institutioner, som Risø har publiceret mest sammen med i perioden 1993-1997 (ISI Source Journals).

Abstract (Max. 2000 characters)

The report contains a list of references to the scientific and technical journal articles, books, reports, lectures published in full text, and to publications for a broader readership authored by researchers at Risø National Laboratory and published in 1998. If the publication mentioned in the reference is electronically available the link to the web-address is added. The references are organised according to the programme areas of Risø.

The text is introduced by total number of publications, distribution of types of publications, number of citations to the international scientific journal articles, institutions with which Risø has published the largest number of articles, and journals in which Risø has published most articles. The data are derived from Risø's in-house Publications Database and from the Risø Institutional Citation Report database produced by the Institute for Scientific Information.
